- \*\* The rate reported is the 7-day effective yield as of March 31, 2019.
- (A) Variable or floating rate security, the interest rate of which adjusts periodically based on prevailing interest rates.
- (B) Step Bonds Represents the current rate, the step rate, the step date and the final maturity date.
- (C) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration normally to qualified institutions. On March 31, 2019, the value of these securities amounted to \$234,573 (000), representing 17.9% of the net assets of the Fund.
- (D) Pre-Refunded Security The maturity date shown is the pre-refunded date.
- (E) Zero coupon security. The rate reported is the effective yield at time of purchase.
- (F) In default on interest payments. Rate shown represents the last coupon rate prior to default.
- (G) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on March 31, 2019.

#### City National Rochdale Fixed Income Opportunities Fund (concluded)

The following table summarizes the quantitative inputs and assumptions used for items categorized as material level 3 investments as of March 31, 2019. The disclosures below also include qualitative information on the sensitivity of the fair value measurements to changes in the significant unobservable inputs.

	March 31, 2019 (000)	Valuation Techniques	
Life Settlement Contracts	\$136,251	Discounted Cash Flow Model	
		Observable Inputs  Maturity Value	
		Unobservable Inputs	Range
		Discount Rate Expected Maturity (months)	13.5% 6-130 months

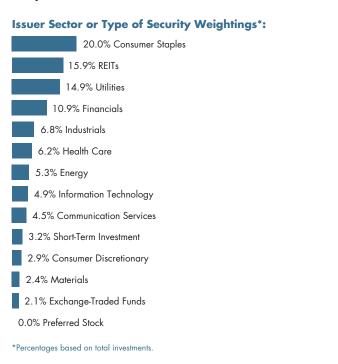

The unobservable inputs used to determine fair value of recurring level 3 assets may have similar or diverging impacts on valuation. Significant increases and decreases in these inputs in isolation and the interrelationships between them could result in significantly higher or lower fair value measurements. Increases in projected collection rates in isolation would result in a higher fair value measurement, while increases in expected discount rates, projected default rates, and maturities of life settlement contracts, in isolation, would result in a lower fair value measurement.

For the period ended March 31, 2019, there have been no transfers between any of the fair value hierarchy levels. Transfers between levels are recognized at period and
