- * Investment in securities measured at NAV using the net asset value as practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented on the consolidated statement of assets and liabilities.
- ** Forwards contracts and swap contracts are valued at the unrealized appreciation/(depreciation) on the instrument.
- (1) Of the \$143,606 (000) in Level 3 securities as of September 30, 2019, \$140,944 (000) or 98.1% are not valued via third party pricing vendors and broker quotes. If significant, the disclosure of the unobservable inputs and the interrelationships and sensitivity between these inputs is required for those Level 3 securities that are not valued by third party vendors or broker quotes.

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining value as of September 30, 2019:

September 30, 2019

City National Rochdale Fixed Income Opportunities Fund (concluded)

The following table summarizes the quantitative inputs and assumptions used for material items categorized as material Level 3 investments as of September 30, 2019. The disclosures below also include qualitative information on the sensitivity of the fair value measurements to changes in the significant unobservable inputs.

	Fair Value at September 30, 2019 (000)	Valuation Techniques	
Life Settlement Contracts	\$140,944	Discounted Cash Flow Model	
Contracts	\$140,944	Discounted Cash Flow Model	
		Observable Inputs	
		Maturity Value	
		Unobservable Inputs	Range
		Discount Rate	13.5%
		Expected Maturity (months)	6-130 month

The unobservable inputs used to determine fair value of recurring Level 3 assets may have similar or diverging impacts on valuation. Significant increases and decreases in these inputs in isolation and the interrelationships between them could result in significantly higher or lower fair value measurements. Increases in projected collection rates in isolation would result in a higher fair value measurement, while increases in expected discount rates, projected default rates, and maturities of life settlement contracts, in isolation, would result in a lower fair value measurement.

For the period ended September 30, 2019, there have been no transfers between any of the fair value hierarchy levels. Transfers between Levels are recognized at period end.

For more information on valuation inputs, see Note 2 - Significant Accounting Policies in the Notes to Financial Statements.

At September 30, 2019, the Fund had the following investments in life settlement contracts:

Year	Number of Contracts	Fa	ir Value (000)	 th Benefits) (000)
2020	3	\$	14,050	\$ 18,500
2021	4		7,400	13,336
2022	11		45,063	81,235
2023	17		44,806	116,500
Thereafter	19		29,625	110,851
	54	\$	140,944	\$ 340,422

For the year ended September 30, 2019, the net change to fair value on life settlement contracts, net of premiums paid and continuing costs disclosed in the Fund's Consolidated Statement of Operations, as part of the unrealized appreciation/(depreciation) on investments, consisted of a net negative change to fair value on life settlement contracts of \$1,700,339, offset by \$21,272,023 in premiums paid and continuing costs associated with its investment in the policies. For the year ended September 30, 2019, the Fund realized gains of \$4,663,465 on matured life settlement contracts, which are disclosed in the Consolidated Statement of Operations, as part of the realized gain/(loss) on investments.
