

City National Rochdale Intermediate Fixed Income Fund

CLASS N QUARTERLY MUTUAL FUND REPORT

SYMBOL: RIMCX

INVESTMENT OBJECTIVE

The Fund seeks current income and, to the extent consistent with this goal, capital appreciation.

INVESTMENT STRATEGY

The portfolio seeks to earn a total return comparable to that of a universe of investment-grade U.S. government, agency, and corporate bonds maturing in ten years or less. Securities selected for investment provide an attractive rate of current income and/or capital appreciation based on the maturity, duration (a measure of price sensitivity in relation to changes in interest rate risk), and credit quality of the issuer relative to comparable issuers. The intermediate-term structure (average duration of 3 to 10 years) seeks to provide for a generally higher rate of current income and a generally greater risk versus that available from debt obligations with shorter maturities.

CREDIT QUALITY*

A	10.3%	US Gov't	27.6%
AA	15.2%	Non-Rated MFs	2.8%
AAA	10.4%	Cash Equivalent	0.5%
BBB	33.2%		

* The credit quality breakdown depicts the credit quality ratings of the Fund's portfolio securities that are rated by one or both of two major nationally recognized statistical rating organizations ("NRSRO"). The two NRSROs currently utilized are Standard & Poor's (S&P) and Moody's. When a bond is rated by S&P that rating is utilized. If it is not rated by S&P, the Moody's rating is utilized. When a security is rated by neither, it is classified as "Not Rated". For bonds, these credit quality ratings are shown without regard to gradations within a given rating category. For example, securities rated "AA-" or "AA+" have been included in the "AA" rated category. Long-term ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). Tier 1: An eligible money market security which receives the top short-term rating from any two Nationally Recognized Statistical Rating Organizations (NRSROs).

The SEC 30 Day yield is a standard yield calculation developed by the U.S. Securities and Exchange Commission (SEC). It is based on the most recent 30-day period covered by the fund's filings with the SEC and reflects the dividends and interest earned during the period after the deduction of the fund's expenses.

Weighted Average Duration is a measure of the average length of time to maturity of all of the underlying instruments in the portfolio weighted to reflect the relative holdings in each instrument, where the maturity of a floating rate instrument is the time remaining until the next interest reset to the money market rate, rather than the time remaining before the principal value of the instrument must be repaid.

Performance quoted represents past performance which does not guarantee future results. The investment return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. The most recent month-end performance can be obtained by calling 800-245-9888.

Returns for periods greater than 1 year are annualized. Investment performance may reflect voluntary fee waivers in effect. In the absence of such fee waivers, total return would be reduced. Fee waivers may be discontinued after January 31, 2022.

*Since Inception of 12/31/1999 when the Fund was the Rochdale Intermediate Fixed Income Portfolio. The Fund was reorganized into the CNI Charter Intermediate Fixed Income Fund on 3/28/13. It continues to be managed in the same way.

This material must be preceded or accompanied by a current summary or full prospectus. Investors should read it carefully before investing or sending money.

Risk Disclosures: Investing involves risk including loss of principal. Bond and bond funds are subject to interest rate risk and will decrease in value as interest rates rise. High yield bonds involve greater risk of default or downgrade and are more volatile than investment-grade securities, due to the speculative nature of their investments. Some bonds within this portfolio may be called at any time by the issuer, limiting the amount of profit potential for that particular bond.

This material represents an assessment of the market environment at a specific point in time and is not intended to be a forecast of future events or a guarantee of future results.

The Bloomberg Barclays Intermediate U.S. Government/Credit Index consists of publicly issued, dollar-denominated U.S. Government, agency, or investment grade corporate fixed income securities with maturities from 1 to 10 years. Bloomberg indices and its associated data, Copyright © 2021 Bloomberg Index Services Limited.
